MAKE THE ROADS SAFER

Radar speed signs are an effective traffic solution to help reduce speed and enables Drivers to become aware of speed reductions on Public and Private Roads. Research demonstrates that when a Driver is alerted by a radar sign, speeding Drivers typically slow down. Radar Signs Show decline in Speed.

Voxson's Radar Speed Sign is the ideal solution to help reduce traffic speed and regulate speed limits by warning the driver when they have exceeded the nonimated speed limit. The sign can be programmed to set a specific speed and display a smiley face when the driver is within the speed limit and display a "SLOW DOWN" or an alternate message when the driver is travelling over the preset speed.

SPECIFICATIONS

- Full matrix SMD LED's with optical LEN's
- Pixel Pitch: P20
- Screen size: 480 x 480mm
- Screen resolution: 24 x 24 pixels
- Brightness: 6000 nits
- Brightness levels: 16 (automatic control)
- Power: 12V DC (240V AC version also available)
- Display different messages for speed areas (e.g. SLOW DOWN)
- Display simple graphics (e.g. SMILEY FACE)
- Communications by RS232, RS485 & Ethernet (STANDARD)
- IP65 rated

FEATURES

- AGD Radar module (radar made in UK & Australian compliant)
- Speed Range 11kph - 160kph (OPTIONAL: 8kph-160kph)
- Vehicle activated
- Variable trigger speeds
- Variable over speed message
- Variable correct speed & image

OPTIONS

- Solar panel & deep cycle battery
- 3G/4G modem or WI-FI access point
- Remote access available if required (*monthly fee applies)
